SQL-Powered Excel

Month/Year

# From Sort & Filter to WHERE and ORDER BY

# Demo: `sort-filter.xlsx`

# Demo: `sort-filter-demo.sql`

# Demo: `sql-select-demo.sql`

# Drills

Using the `Managers` table:

1. Select all records, sorted newest to oldest, then by playerID alphabetically.
2. Select all records between the 1991 and 2000 seasons, sorted high to low by number of games, G.
3. Create a field, win_diff, calculated as W - L. Return the records with the 25 highest values of win_diff.

# Drills

Using the `Managers` table:

1. Select all records, sorted newest to oldest, then by playerID alphabetically.
2. Select all records between the 1991 and 2000 seasons, sorted high to low by number of games, `G`.
3. Create a field, win_diff, calculated as W - L. Return the records with the 25 highest values of win_diff.

Solutions: `sql-filter-drills.sql`
